> For many organizations, Enterprise Project Portfolio Management is not just a necessary core competency but rather a critical discipline for improving business performance and building new capabilities

IT Business Management

Enterprise Project Portfolio Management

Companies fall somewhere on a maturity curve when it comes to Enterprise Project Portfolio Management -- at one end are companies where projects are not formally assessed prior to starting and status may be captured on spreadsheets, if at all; on the other end of the curve, mature organizations may quantify the benefits from each project initiative and then track the achievement of those benefits over the project lifecycle.

ServiceNow Enterprise Project Portfolio Management is a set of applications that has the capability to:

- Assist an organization in moving up the PPM maturity curve
- Integrate seamlessly with other ServiceNow applications
- Formalize the process of determine which projects to undertake
- Align organization's objectives with their business strategy.
- Ensure projects execute successfully with minimal risk

Depending on where your company is situated on the Enterprise Project Portfolio Management curve, InSource provides four offerings improve your Enterprise Project Porfolio Management process. These can be implemented individually or as part of a package customized to your company's needs:

1. DIAGNOSIS

This rapid assessment will survey your whole project management discipline, reviewing tools, process and organization to identify what level of Enterprise Project Portfolio Management maturity exists and where the primary opportunities lie. This diagnostic, which takes less than a week to undertake and uses a website customized to your organization, is an excellent foundation for determining the scope and roadmap for an Enterprise Project Portfolio Management implementation.

2. PROCESS WORKSHOPS

These focused workshops, with predefined agendas and tools, will help you define your Enterprise Project Portfolio Management practices appropriate for your organization. Each workshop lasts for five days and can be undertaken as one contiguous working session or multiple sessions split over multiple weeks. At the end of the workshops you will have well-defined processes ready for implementation and automation.

3. SERVICENOW IMPLEMENTATION

Rapid implementation of the ServiceNow Enterprise Project Portfolio Management suite, in three primary options covering Resource Management, Project/Portfolio Management and Demand Management. Select the most apropriate implementation bundle and use our accelerators to drive business value quickly.

4. SUPPORT

A package of support with regular health check assessments, combined with remote systems support so that you are not constrained by your internal resources as you continue to drive value with the Enterprise Project Portfolio Management tools.
